

PROJECT PROFILE

RMAX ECOMAXCI® WALL SOLUTION

Fieldhouse Dinkytown Apartments

PROJECT DESCRIPTION

The Fieldhouse Luxury Apartments is located in the Dinkytown neighborhood of the University of Minnesota. This 12-story building will have over 250 units for students, and will be completed before the fall semester of 2023. Just northwest of UM Seibert Baseball Field, this luxury apartment building is in a great location and will have the latest amenities.

The architect on this project is Cuningham Group Architecture, Inc. - Minneapolis, used our ECOMAXci® Wall Solution over the entire building envelope that includes 3 different claddings (masonry, metal façade, cement board) throughout the exterior of the building. Eisen Panel Group is providing all the wall panels for this 12-story building with DensGlass sheathing with 2.5" ECOMAXci® Wall Solution covering. Working with IronMark Building Co. on the site has been outstanding. They are very thorough and make sure everyone is on the same page. Also keeping all the contractors that are involved with our product up to date on any changes or issues. The project is running very smooth.

"We are accustomed to Thermax, but Rmax's product is definitely a better looking product" - Joe Zintl

Assembly: Steel studs with 2.5" ECOMAXci® Wall Solution with various façade.
